Commence sowing the extra early varieties as soon as the ground can be worked in March; continue for a succession every two weeks until June. The wrinkled varieties are not as hardy as the small round sorts, and if planted early should have a dry soil, or they are liable to rot in the ground; they are, however, the sweetest and best flavored.

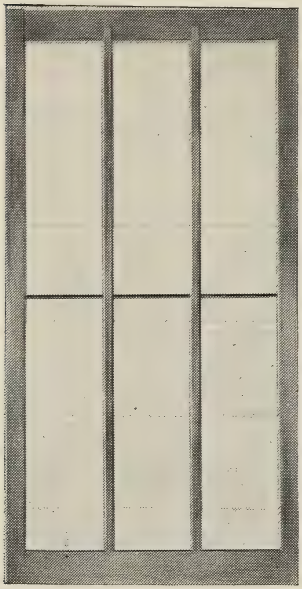
BURNETT'S REINFORCED HOT BED SASH AND SUNDRIES

Single Sash, Glazed–3x6x1½ in. Thick

Our sash are made from 1½″ gulf cypress, glazed with double thick "A" quality glass in lights 10″ wide, the top and bottom rails are 4″ wide, the side stiles 2½″ wide and the bars 1¼″. The bars are tenoned at both ends and mortised into the rails and the rails into the side stiles; the tenons are steeped in oxide of iron and oil before assembling. These sash are much stronger than the ordinary market sash and are tied across the center with a square iron bar, thus making the sash very rigid. They are painted two coats of white lead and oil and the glass is bedded in special greenhouse putty.



These sash weigh 40 lbs. each and are made perfect in every way.

Price, Glazed and Painted, complete. Each $4.25, doz. $48.00.

Price, Unglazed and Painted one coat. Each $2.00, doz. $22.00.

Price, Unglazed and Unpainted. Each $1.50, doz. $17.00.

Sash Double Glazed, Frost-Proof

The general opinion of gardeners who have given Double Glazed Sash a fair trial is that it has a considerable advantage over single glazed, as it will protect the plants in cold weather without the use of mats and shutters. In climates like New York and vicinity it is, however, necessary to use mats and shutters during the more severe weather. We believe that the bedding of the outer glass in putty is a decided advantage, as it makes the sash leak-tight. Aside from the double glazing these sash are made identically the same as our reinforced Single Glazed Sash.

Price, Glazed and Painted. Each $5.00, doz. $55.00.

Cypress Slats

Slats are for shading transplanted seedlings. The hot sun of August and September is too strong for the seedlings to stand. A week of the slats and they will have thoroughly strengthened up. They are also particularly useful for pansy growing. They are 3 feet wide and 6 long. The evenly spaced strips of cypress are let into the binding cleats and clinched into position by wire nails. They keep their shape, an important point with slats. Price, Painted. Each $1.50.

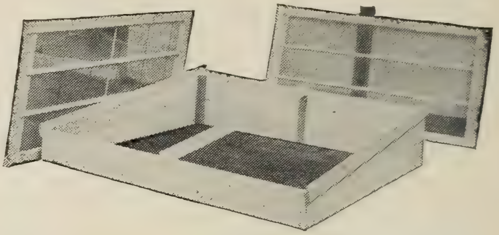
Hot Bed Mats

Frost-Proof, Burlap. 76x76 in. square; Each made of strong burlap cloth, filled with wool ....Doz. $16.00 $1.50

Waterproof Duck. Filled same as above, with waterproof duck cotton cloth on one side. Size 76x76 in..........Doz. $22.00 2.00

Burnett's Garden Frames

All our frames are made of the finest air dried cypress. The sides and ends are held together by heavy wrought iron angle cleats. No nails are used in their construction. They are easy to put up or take down, and are made for regular standard 3x6 feet sash. They are 8″ deep at the front, 16″ at the back. The rafters are 3x3 inches and rabbeted for sash to slide on, and grooved to carry off the condensation. They are given two coats of best lead and oil before shipment. Shipped knock down. Two, three and four sash frames kept in stock—others made to order.



Price, without Sash for two Lights, $9.00.

Price, without Sash for three Lights, $10.50.

Price, without Sash for four Lights, $12.00.

Shutters

Shutters do three things: Keep the mats snug in place—protect them from the weather—and do their part towards keeping out the cold.

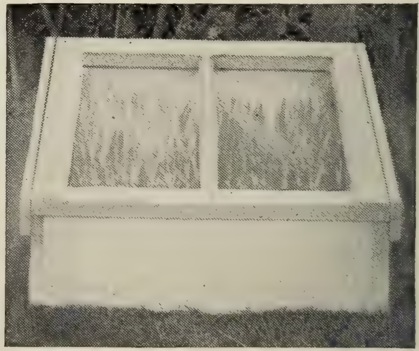
These shutters are "light to handle and stand the racket." They are 3 by 6 feet and made of ⅝-inch cypress, having tight tongued and grooved joints. The three cross binders on the under side hold the boards together and prevent them warping out of shape.

Price, Painted. Each $2.50, doz. $25.00.

Price, Unpainted. Each $2.00, doz. $20.00.

Melon Frames

Try a half dozen of these frames and not only have melons earlier, but melons with the true melon flavor. Starting early with frames gives them a chance to make good strong root growth to withstand the hot Summer's sun, so the best of the plant's strength can go into the fruit. Made in the same thorough way as our other frames.



Price, Standard Size 22½x25½, with two Lights of glass. Each $3.00.

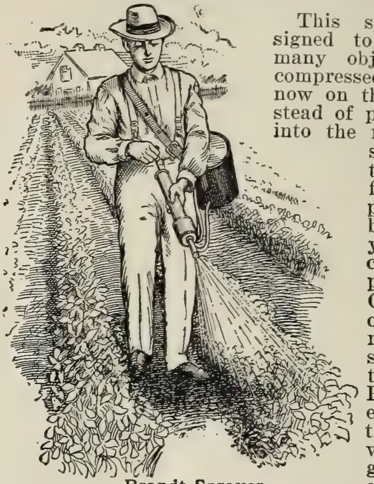
THE BRANDT SPRAYER

A NEW DISCOVERY

The most important detail of the NEW BRANDT SPRAYER is the device for pumping the air into the tank while walking, a feature just discovered and is found in no other sprayer.



Brandt Sprayer

This sprayer is designed to overcome the many objections to the compressed air sprayers now on the market. Instead of pumping the air into the reservoir before starting to spray this sprayer is fitted with a pump which can be worked while you walk, thus controlling the pressure at will. Can be used for one or two rows, and will spray from 15 to 25 hills of Potatoes with each stroke of the pump. Reservoir holds three gallons of liquid, enough to spray a row a mile long, with only one filling. The nozzles are made on a new principle and work with a combination of liquid and air which produces more force with 7 lbs. of pressure than others do with 100 lbs., giving a fine mist-like spray which is sent out with such force that clogging is impossible.

"STANDARD" FLOWER POTS

The Advantages of Standard Pots:

FIRST—Uniform sizes throughout the country.

SECOND—Breakage is not one-half as great as in other pots, the deep rim protecting them from any ordinary hard usage.

THIRD—The foot keeps the pot up from the bench, so that it is impossible for the hole to become clogged.

All Standard Pots from 7-inch and above are provided with the patent Excelsior bottom which insures perfect drainage.
